Professional Summary

Full-stack engineer who ships features end to end — from Vue.js/Nuxt.js and React interfaces to Node.js/Nest.js services and databases. Deep FinTech and digital-identity experience across KYC/KYB/AML, fraud detection, crowdfunding, supply chain financing, and eSignature, including production systems handling 10M+ verifications. Comfortable owning the full lifecycle: UI, API design, data modeling, performance, and deployment. Acted as interim Tech Lead for a 10-engineer team and built multiple platforms from scratch. Strong in both component architecture and distributed-systems concepts (microservices, message queues, caching).

Skills

- **Frontend:** Vue.js, Nuxt.js, React, Next.js, TypeScript, Tailwind CSS, Responsive Design, Component Architecture
- **Backend:** Node.js, Nest.js, Express, REST APIs, Microservices, Message Queues (Kafka / RabbitMQ / SQS), Event-Driven Architecture
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **DevOps & Cloud:** Docker, AWS, CI/CD, Linux, Git
- **Practices & Security:** Playwright, Postman, Agile/Scrum, End-to-End Encryption, Compliance-Driven Design (KYC/AML), API Integrations (Slack, Jira)
- **Domain:** FinTech (KYC/KYB/AML, Crowdfunding, SCF, eSignature), Identity Verification, Enterprise Web Apps
- **Emerging:** Applied AI, LLM Integration, Prompt Engineering

Experience

Manafa Technologies, Lahore (On-site) — Senior Software Engineer (Full-Stack: Crowdfunding, SCF & Sales CRM)

Aug 2025 – Present

- Designed and built a **Sales CRM from scratch** and currently lead its development end to end — Vue.js/Nuxt.js frontend, Nest.js APIs, and data modeling — replacing manual sales tracking with a single source of truth for the sales team.

-
- Developed full-stack features across a production **crowdfunding platform**, spanning borrower, investor, and admin areas — building UI alongside lending workflows, transaction logic, and role-based access.
 - Built **supply chain financing (SCF)** capabilities for enterprise programs involving **Aramco and J.P. Morgan**, delivering financing workflows to demanding compliance and reliability standards.
 - Designed and built a complete **Employee Directory System** from scratch (Nuxt.js frontend, Nest.js + MySQL backend), integrated with Slack and Jira APIs for real-time search, workload visibility, and reporting-hierarchy tracking.
 - Automated daily sync jobs to keep records current, improving cross-squad collaboration and organizational transparency.

Programmers Force, Lahore — Software Engineer (Full-Stack)

Nov 2022 – Jul 2025

Shufti Pro (UK) — KYC/KYB/AML & eSignature Products

- **FinTech Platform (KYC/KYB/AML):** Built 20+ verification modules end to end (Vue.js front end, Node.js services) for a platform handling 10M+ verifications. Acted as interim Tech Lead for a 10-member team, coordinating Agile sprints across QA, design, and product.
- Boosted application performance by **~30%** through frontend render optimization and backend query/caching improvements; introduced Playwright automated testing to reduce regressions.
- Implemented **end-to-end encryption** for sensitive payloads using cryptographic algorithms.
- **eSignature Product:** Designed and deployed a digital signing platform that cut manual document processing time by **~70%**, building both the signing UI and backend integrations on a compliance-first architecture.

Facia.ai — AI Fraud Prevention

- Developed **Facia.ai**, a fraud prevention platform with facial recognition and liveness detection using Google MediaPipe.
- Built backend services in Node.js/MongoDB and Vue.js frontends, deployed for **enterprise and government clients** requiring high-accuracy identity verification.

Education

BS Computer Science — Virtual University of Pakistan, Lahore

Graduation Year – 2022

Certifications (Select)

- **Working with the OpenAI API** – Datacamp (2026)
 - **Introduction to LLMs** – Sololearn (2025)
- (Full list of **43 certifications** available on [LinkedIn](#))
